Customers may come to you when the batteries in their Little Sun Original lamps have come to the end of their lifespan. You should replace the batteries for them.

Keep your customers’ used batteries safe and return them to your distributor, who will properly recycle them in accordance with local rules and regulations.

If the batteries must be replaced after two years of purchase, sell new batteries to your customer; or if you do not have a stock, refer them to your distributor:

Batteries must be recycled or disposed properly – do not short circuit or dispose of in fire.
